(Liquidate report printing)

PROFESSIONAL MANAGEMENT ABILITY

- ❖ ECUS_EX is able to provide enterprises with professional management following Import-Export model and to match with every officer of Import-Export department: import officer, export officer, norm officer, liquidation officer.
- ❖ ECUS - X provides decentralization function to particular user: each user must have their own user name and password for system login.
- ❖ ECUS_EX allows administrator to distribute permission to match with duty and function of each user in his department, to ensure that he can only perform the right function relating to his job.

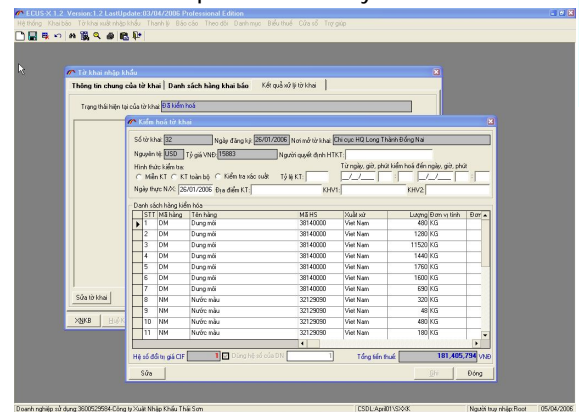

(Management decentralization to users)

INFORMATION MANAGEMENT

- ❖ Data status is supervised by ECUS - X, making sure whether this status can be changed or not in order to synchronize with the customs system. Import - Export data is always in one of the following status: Not declaring - data preparing for declaration, Declared: Data transferred to customs and waits for being registered, Approved: Data registered and approved by customs.

ECUS_EX manages full information of declaration sheet according to steps: register information, checking information, tax information, and tax adjusting information.

All Import-Export data are sorted in SQL server 2000 Database Management System; companies can safely store data in many years and the data can be used to create statistical reports for other systems.

(Information of declaration sheet and result of liquidation)

SYSTEM REQUIREMENTS

FOR SINGLE PC VERSION:

- ❖ CPU Pentium IV 1GHz or higher.
- ❖ Operation System: Windows XP or higher
- ❖ RAM: 1GB is minimum
- ❖ Empty at least 500 MB disk space.
- ❖ Resolution: 800 x 600 pixels is minimum.

FOR GROUP WORKING VERSION:

- ❖ CPU Pentium IV 1GHz or higher.
- ❖ RAM: Server: 2GB or higher, Client: 1GB or higher.
- ❖ Operation System: Server: Microsoft Windows 2003 Server or higher Client: Microsoft Windows XP or higher
- ❖ Empty at least 500 MB disk space.
- ❖ Resolution: 800 x 600 pixels is minimum.

FUNCTIONS

IMPORT-EXPORT OPERATION MANAGEMENT Standardize Import-Export Information Workflow Management	
Raw material management	Raw materials are managed according to declaration status.
Export product code management	Product code lists are managed according to declaration status.
Norm management	Norm and loss are managed, norm is declared to customs
Import declaration management	Import declaration sheets are managed by steps: Register, Checking order, Tax calculate, Tax adjustment Print declaration to post papers
